

MANIFESTO

March 2016

THE CHALLENGES

Together with more than **100 WOMEN WORKING IN TECH** we've created the following manifesto. It's our declaration of the intentions and motives of this network, created by our members. Over time, this manifesto will evolve.

NETWORK

A sustainable network is built on meaningful connections, where people share interests & goals in order to grow personally and professionally.

Networking is a community of people realizing their goals.

Consistently nourish your network to make it flourish.

We want to shape the future of technology to be more inclusive.

Make meaningful connections so that we can learn from each other & have a tangible influence on the future of technology.

DIVERSITY

Equal Expectations: We want to encourage women at whole spectrum, make them visible from school to high point of career. We know that women are at all tech positions and they do their job. We want to show that women are in tech and that they like it and that it's normal.

Stop Stereotyping: We believe that the best teams are diverse teams, not in terms of gender, religion or colour but in strengths that are offered. Stop stereotyping embrace different personalities and stay curious.

Inclusion: We believe that diversity should include not exclude. Nevertheless focusing on our network and our strengths will support us in reaching equal positions and rights.

CAREER

Mentoring: We want to provide a network of experienced women who can support you in any business area/career related question.

Empowerment: To empower we need to give, share and accept empowerment. The goal of this network is to develop strategies to empower one another.

Network: 'We shape tech' is a supportive and fostering network of women in tech ...it hostes regular meetups, provides a dedicated platform and increases visibility.

UNCONSCIOUS BIAS

We believe women should exercise “thinking like a president”!

Be bold and show it.

Speak up with confidence.

We want to make bossy the new beautiful.

YOUNG GENERATION

Career: You shape tech - tech is the future.

Motivation: Learn what you want to learn.

Image: Our mission is to establish the image of a cool and passionate female geek.

Early education: Our goal is that all kids get the chance to learn to code.

Role model: We want young girls to want to be like us.
